DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. Neoplastic disorders (see claim 10) please choose one;
- B. Variable light chain regions (select a single sequence from each of i-vi)
 - i. FRL1 SEQ ID No: 20-25
 - ii. CDRL1 SEQ ID No: 99-103
 - iii. CDRL2 SEQ ID No: 104-114
 - iv. FRL3 SEQ ID No: 30-56
 - v. CDRL3 SEQ ID No: 115-116
 - vi. FRL4 SEQ ID No: 57-59
- C. Variable Light chain region of SEQ ID No: 3,5,7,93,95,97,142,144, or 150
(select a single sequence).
- D. Variable heavy chain regions (select a single sequence from each of i-vii)
 - i. FRH1 SEQ ID No: 60-66
 - ii. CDRH1 SEQ ID No: 117-122
 - iii. FRH2 SEQ ID No: 67-75
 - iv. CDRH2 SEQ ID No: 123-134
 - v. FRH3 SEQ ID No: 76-90

vi. CDRH3 SEQ ID No: 135-141

vii. FRH4 SEQ ID No: 91-92

E. Variable heavy regions of SEQ ID No: 4,6,8,94,96,98,143,145, 146, 147, 148, or 149 (select a single sequence)

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Each sequence represents a structurally distinct molecule that corresponds to the manufacture of a distinct antibody. Because each sequence recited generates a materially distinct antibody, separation of the sequences for initial examination is required.

The following claim(s) are generic: claim 1, 26, and 32.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: See paragraph 2 above.

Art Unit: 1643

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
